

Since January 2020 Elsevier has created a COVID-19 resource centre with free information in English and Mandarin on the novel coronavirus COVID-19. The COVID-19 resource centre is hosted on Elsevier Connect, the company's public news and information website.

Elsevier hereby grants permission to make all its COVID-19-related research that is available on the COVID-19 resource centre - including this research content - immediately available in PubMed Central and other publicly funded repositories, such as the WHO COVID database with rights for unrestricted research re-use and analyses in any form or by any means with acknowledgement of the original source. These permissions are granted for free by Elsevier for as long as the COVID-19 resource centre remains active.

## Correction

**Emerging Pandemic Diseases: How We Got to COVID-19**

(Cell 182, 1077–1092; September 3, 2020)

It has come to our attention that in preparing the final version of Table 4, an error was made in footnote 2. Inhalation was omitted as a method of acquiring anthrax, and person to person spread was mistakenly described for pulmonary anthrax, but it should have listed cutaneous anthrax. Footnote 2 should read “Anthrax is acquired by inoculation, inhalation, or ingestion of spores, but the cutaneous form of anthrax can be spread person to person.” The error has been corrected online, and we apologize for any confusion.
